

GAVIoTA

Graphical Analysis & Validation of IoT Assets

Acquire temperature and track location in real time using BLE beacons.

- Web-based UI
- No external database
- Reports: graphical and CSV

Beacons

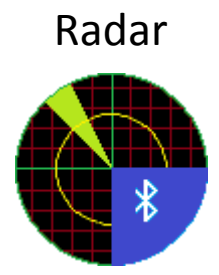

BLE Gateway

Temperature

Beacons

Android App

Temperature & Location

Support virtually all kinds of beacons from different vendors, including proprietary:

Can track non-beacon BLE devices, e.g.: Smart Bands, wireless speakers, ...

Support Android TV / Fire TV

Very low power usage
